

Kodak DIRECTVIEW Version 5 Software

Robust software platform for KODAK DIRECTVIEW CR & DR Systems offers power, performance and image processing enhancements.

KODAK DIRECTVIEW CR & DR Systems are synonymous with workflow-enhancing productivity and outstanding image quality. Now, with the introduction of KODAK DIRECTVIEW Version 5 Software, Carestream Health, Inc. is taking DIRECTVIEW System ease-of-use, reliability and performance to a new level.

Version 5 software is available with new DIRECTVIEW System installations and as an upgrade to existing systems. It adds an array of new and improved capabilities that enhance productivity, performance, and ROI for healthcare providers of all sizes and complexities.

Version 5 Features

Enhanced customization—Allows systems to be easily configured to the needs of the facility and the unique preferences of the users.

EVP Plus Image Processing—New advanced image processing that puts the power of optimizing image processing into the users' hands. In addition, the frequency processing delivers improved mammography images.*

Improved workflow and productivity—Ease-of-use features enhance hospital and clinic productivity and increase patient throughput and satisfaction.

Improved interconnectivity—Enhanced connectivity capabilities help improve compatibility across multiple "upstream" and "downstream" networked devices.

Reduced service costs—Online context-sensitive HELP feature and improved service diagnostics result in more system uptime and fewer on-site repair calls.

Flexible and Easy to Use

KODAK DIRECTVIEW Version 5 Software offers a host of flexible "designed for the way you work" features and solutions that enhance the KODAK DIRECTVIEW System user experience for radiographers, technologists, and administrators.

- ▶ Simplified user interface reduces the time required to complete a procedure.
- ▶ Image processing parameters can be changed according to exam type and user preference.
- ▶ Support for high-resolution monitors make on-screen image review easier.
- ▶ "Zoomed" images can be adjusted for easier viewing.
- ▶ Support for unlimited number of exam types.
- ▶ Consistent image presentation (e.g. annotations, flip/rotate/zoom) across multiple hardcopy and softcopy devices.
- ▶ Automated transfer of mammography exposure data from X-ray device to DICOM image record with X-ray interface option.*
- ▶ Robust, context-sensitive, on-screen HELP feature that provides immediate problem resolution, minimizes support time, and helps maximize productivity.

KODAK DIRECTVIEW EVP Plus Software

KODAK DIRECTVIEW Version 5 Software introduces EVP Plus Image Processing which takes the automated optimization of image appearance to a new level. This new EVP Plus Image Processing is designed with a number of time saving features that reduce capture set up times, as well as elevate the overall quality of the image output. The results are greater operational efficiency and more consistent, higher quality images that help improve patient diagnosis.

- ▶ Easy exam setup reduces the required time per patient, resulting in greater throughput.
- ▶ Image Preference Setup Tool enables the customization of image processing for specific sites. Users are able to pre-select a preferred look for their images prior to system installation.
- ▶ Default images' settings can be selected from multiple body part "looks" and groupings.
- ▶ Brightness, latitude, contrast detail, and noise level can be independently adjusted by qualified users to yield preferred images.
- ▶ Body part independent image processing.
- ▶ Qualified users can change default appearances and preference editors.
- ▶ Easy and intuitive adjustments can independently control image parameters.
- ▶ Improved black surround feature automatically enhances image resolution.

Choice of System Options

Expand the capability of KODAK DIRECTVIEW Systems with a variety of available system options such as Administrative Analysis and Reporting, KODAK DIRECTVIEW Capture Link Software, KODAK DIRECTVIEW Total Quality Tool, Mammography Imaging Feature*, Long-Length Imaging Training, Dose Area Product Meter, and many others.

Trusted Reliability

KODAK DIRECTVIEW Version 5 Software includes enhanced security provisions that protect healthcare providers and the system against financial and operational threats.

- ▶ CSA (Cisco Security Agent) support provides increased assurance that your KODAK DIRECTVIEW CR and DR Systems are protected from malicious malware.
- ▶ Enhanced monitoring capability helps control unauthorized user access.

Training—Effectively and Efficiently

Understanding the power of your KODAK DIRECTVIEW CR or DR System is essential for radiologists, radiographers, technologists, clinicians, and other key operators.

Training for DIRECTVIEW Systems equipped with Version 5 software is delivered in a variety of efficient, economical ways including CD media, built-in HELP menus, installer-delivered training, and applications consultant-delivered training.

The self-paced training CD provides pre-system installation learning for key operators. It also serves as a refresher tool for current users and can be used to train new employees after the system is implemented, as well. Version 5 software also includes a context sensitive online HELP tool that provides specific information on the functionality and operation of the system.

Finally, as part of the installation process, CD-based training and the online HELP tool are augmented by personal onsite training provided by Carestream Health training and installation consultants who cover, among other things, system customization that is designed to deliver maximum utilization and performance.

Carestream Health also offers additional specialized training products to address specific applications and needs. These "as needed" courses are designed to complement the training that is included with the system. Customers are able to purchase the amount of additional training they need on a flexible, "a la carte" basis.
